\$999.00

Time of Service Important Notes and Disclaimer:

All customers are responsible for providing safe roof access for our technicians. Please remove all food-related items from the areas to be cleaned. If you elect not to have your filters cleaned by our technicians, then they will be taken down and set aside neatly in your dish room or put back up dirty. Please ensure there is access to hot water as the technicians will need to use hot water to clean your system.

Please note, white residue or streaks are normal after a cleaning as our technicians specialize in cleaning the kitchen exhaust system to NFPA code compliance, and they are not cleaning the kitchen to aesthetically please. Some water dripping after the system is cleaned is normal, and some light tidying up may be needed by your staff after this kind of service.

This cleaning is only for the services and descriptions elected above. D&V Pro Cleaning requires a cleaning frequency of every 6 months or sooner to maintain this pricing for future services. Services with a frequency greater than 6 months will accrue a \$200 annual service frequency fee. This quote is valid for the next 30 days, after which values may be subject to change.

Additional Notes:

- We can only clean accessible areas, such as horizontal ductwork with access panels and fans with hinges.
- For safety reasons, we cannot remove fans from their base if they do not have hinges, as this poses a significant risk to the fan.
